

Master of Science in **Wealth Management**

Applications for the 2026 Intake are **OPEN**

Fees: P 130,000.00

This programme is designed to develop critical and analytical skills across wealth and investment management, enhancing learners knowledge to prepare for a career in banking, finance or business. The programme is designed to meet the growing demand for highly skilled and intellectual professionals in wealth management. Learners will gain specialist knowledge in investment management and finance, while developing their ability to research, appraise and critically evaluate current issues in the financial sector. This programme covers topics in areas of pensions, socially responsible mutual funds and the impact of hedge funds on economic growth.

This programme is offered by Botswana School of Business Sciences in collaboration with Sheffield Business School which is accredited by the Association to Advance Collegiate Schools of Business (AACSB), placing them in the top 6% of business schools globally. In addition to excellent BAC tutors, learners also benefit from Sheffield Hallam's exceptional teaching, which is rated 5* in the latest QS Top Universities rankings.

Programme Summary

- Develops transferable skills for national and international business.
- Explores financial markets, institutions, regulation and systems development.
- Analyses financial risk strategies for investment and portfolio management.
- Undertakes real-world learning to gain immediate value for current or potential employers.

Learning Methods and Mode of Delivery

This programme starts by helping learners develop a strong understanding of wealth management and the practical skills relating to investment management and finance practices globally. They will be taught by staff who have industry experience and/or are active researchers. Through a combination of face to face teaching methods learners will develop in-depth knowledge and a range of skills. Learners will implement theories and techniques, problem-solving activities, research and teamwork – taking an active approach to learning and self-development.

Future Careers

This programme prepares learners for careers in:

- Wealth Management
- Banking
- Finance
- Portfolio Management
- Business Consulting

Modules

The masters is achieved by completing FOUR 30 credit modules and the final research or consultancy project, which is a triple module worth 60 credits, during which learners will undertake an in-depth independent study or consultancy project.

- Advanced Portfolio Theory for Fund Management
- Financial Management and Investment Risk
- Financial Stability, Regulation and Sustainability
- Statistics and Big Data in Finance
- Dissertation OR Consultancy Project

Entry Requirements

The programme requires one of the following:

- 2:2 honours degree or above in a relevant subject
- A recognised postgraduate or professional qualification

Duration and Commencement Dates:

The minimum duration is 2 years. Application are now open. The course commences in September 2026. **Deadline for application 31st July 2026.**
